MOUNT OLIVE LUTHERAN CHURCH
Minneapolis, Minnesota

Mount Olive Lutheran Church was built in 1909 and the education wing was added in 1957. The needs of the church have changed and the original classrooms and discrete spaces of the 1957 addition no longer fulfilled their mission to serve their community and have ample space for gathering.

We provided full architectural services for the remodel of the education wing of the church including:

- Improved traffic flow and security for both visitors and employees.
- Better functioning gathering spaces that allow for flexibility of group sizes with interiors that are sympathetic to the 1957 aesthetic of the space.
- Code compliant toilet rooms that are easy to find and provide adequate space for people of all abilities.
- Remodel of two kitchens.

SCOPE
- Building survey
- Programming
- Design
- Cost estimating
- Construction Documents
- Construction Administration
